

Family Definition

It is important that we protect employees and their families. This is why our definition of family is different than most benefits.

Under Roof / Under Wallet

If the employee is financially responsible for an individual's living expenses or if the individual lives with the employee, they can be added to the family plan coverage.

Examples:

- College student supported financially by the employee, protect her!
- Parents have to move in with the employee for medical or financial reasons, protect them!
- Brother moves in with the employee because he just lost his job, protect him!
- Adult child lives at the employee's home for medical reasons, protect her!
